CONSULTING  
ENGINEERS

PROGRAM/PROJECT  
MANAGEMENT

DESIGN/BUILD

*A Veteran-Owned Small Business*

After a decade in management with ENR top 25 Engineer/Constructor firms, Paul Curtis used his Civil Engineering Technology background from Florida A & M University and active duty with the U.S. Army Corps of Engineers to founder Curtoom. This company is a civil works consulting/construction firm, principally performing work as a subcontractor throughout Florida.

From inception, Curtoom established a solid track record as a capable and reliable public works contractor. The firm performed over two dozen contracts valued at \$1 million or more on various EPA funded wastewater treatment plant facilities and Department of Transportation road projects in the 1990's.

As the firm grew it became recognized as one of Florida's largest and most capable small family-owned businesses in their area specialty.

Later, qualified as a Professional Engineer, the firm began consulting on modest engineering projects.

Today Curtoom uses its acquired national expertise, a foundation based in technology and reputation, to provide project management and engineering services to clients with requirements within our scope of services and capability.

## ***What Would You Like To Build Today?***

**Curtoom** provides services that help our clients successfully manage their project's cost, time, and quality. Whether we work at the program level, at the project level, or act as the manager on behalf of a client, our services are tailored for each situation to add value by providing timely, meaningful, and accurate information.

- Transportation
- Education Facilities
- Water Resources
- Public Housing
- Health Care
- Correctional Facilities

## **PROFESSIONALS WITH OVER 100 YEARS EXPERIENCE**

Curtoom has extensive experience in planning, design, permitting, preparation of bidding and construction documents, construction administration or observation, and feasibility analysis for water and wastewater systems. These services are provided for municipal, county, state and private clients. We introduce and advise you and/or your staff of all the elements necessary for smooth operations.

**Water Resources**

We partner with our clients to upgrade expand and modernize their assets by optimizing utility operations, water and wastewater treatment facilities, build highways, and relocation and redevelopment of government installations.

**Program/Project Management**
